# SAUTER modulo 3 room automation stations

The BACnet MS/TP SAUTER ecos 3 room controllers are application-specific controllers (B-ASC) for applications such as fan coil units, chilled ceilings, chilled beams or radiators. They ensure an optimal room climate (heating, cooling, ventilation) with easy but also flexible parameterisation (2-pipe/4-pipe installations, changeover, frost protection, reheaters, and connecting presence detectors, window/door contacts, etc.). The controllers can be easily integrated into the building automation network and visualised in the building and room automation management system.
